- Large Case (10"W x 10"H x 6" D) for 15' of cable or more including

Aero XDC, XDC Duo & XDC Mini

Photographers shooting to external hard drives can keep their drives and external devices secured to the Tether Table Aero via Tether Tool's External Drive Compartment. The XDC, XDC Duo and XDC Mini help the photographer:

- Overcome limited internal computer hard-drive space
- Back-up photos in real time
- Protect against drive failure which can cause loss of images and work
- Allow images to be easily transport to a different computer after the shoot wraps

The XDC is a low-profile sleeve which mounts directly under the table's surface, via the LAJO-4 ProBracket. The compartment's tunnel design allows for easy connectivity of drives and cables. The open structure also provides efficient ventilation, keeping drives cool. Artfully designed to integrate with the complete Aero System product line, the XDC is:

- Designed to fit popular mobile external hard drives, such as the LaCie Rugged or G-Tech Mini.
- Constructed of the same lightweight T6 Aerospace aluminum as the Aero Series
- Finished in brushed silver or non-reflective black to complement existing Tether Table Aero
- Can be positioned on either side of the Tether Table Master, Standard or Traveler
- Compatible with the Aero MacBook Pro 13", 15", 17" and iMac Tether Table and can be positioned on the left side of these tables

The Aero XDC, designed for a single drive, measures 4"W x 11/8"H x 6"D / 101mm x 29mm x 152mm. The XDC Mini, XDC Duo and custom designed compartments are also available

ProPad for the Tether Table Aero

The best inventions come out of necessity; hence the Aero ProPad for the Tether Table Aero System. It's an easy-to-use cushioned, non-slip pad designed to keep your table and the photography gear you put on it from slipping or scratching. All of the Aero ProPads are custom-made for their respective table sizes. Plus, they are water-proof and stain-proof, so they easily wipe clean and remain looking new.

JerkStoppers®

The JerkStopper® product line is designed to provide extra security for camera and computer equipment which is often susceptible to cord or cable interference. Various JerkStopper options ensure tethering cables, synch cords and power cords do not inadvertently dislodge from equipment potentially damaging or shorting out equipment. The JerkStopper product line will protect plugs and cords from being damaged due to sudden jerking or extraction from equipment.

JerkStopper Camera Support

- Ideal for tethering cables and/or flash sync cords.
- The JerkStopper Camera Support, exclusive to Tether Tools, removes the stress and strain from the cable or sync cords coming into the camera, ensuring the plug stays in and protects from damage.
- Patented device provides slack in cord preventing damage or dislodging.
- Once installed, the quick disconnect clasp enables future tethering of flash sync set-up in seconds.
- Designed for cables 3.5mm to 8.5 mm diameter
- Made in the USA

JerkStopper Computer Support

- Ideal for cables, flash sync cords and computer power cords.
- The JerkStopper Computer Support removes the stress and strain from cables or cords coming into the computer, ensuring the plug stays in and protecting from damage.
- Patented device provides slack in cord preventing damage or dislodging.
- Various configurations available
 - o Use an available USB port, OR
 - o A RJ11 (telephone modem jack), OR
 - o A RJ45 (network Ethernet jack), OR
 - o Flat mount design which Velcro's directly to the Tether Table (Velcro included).
- Designed for cables 3.5mm to 8.5 mm diameter
- Various JerkStopper kits and configurations available

All Tether Tools Products are made in the USA.
