ABOUT CASE AIR
The Case Air Wireless Tethering System connects and transfers images instantly from your camera to a phone, tablet or computer using the downloadable Case Remote software/app. Case Air lets you control advanced camera settings including focus points, exposure settings, bracketing/HDR, time-lapse, and more. View your images on a larger screen to check critical focus and composition, or use Live View or movie mode for real-time capture to share and collaborate as you create.

CASE AIR CAMERA COMPATIBILITY
Visit www.TetherTools.com/CaseAir for a complete list of compatible cameras.

If either of the messages below are displayed on your Case Remote App, set up your WiFi connection and press the Refresh button to connect your camera to your Case Air.

CASE REMOTE APP

1. Camera information
2. Refresh connection

If either of the messages below are displayed on your Case Remote App, set up your WiFi connection and press the Refresh button to connect your camera to your Case Air.

FIRMWARE UPDATE

If a firmware update for the Case Remote App is needed, you will see the Attention screen. MAKE SURE the Case Air battery and the battery on the device you are connected to is fully charged prior to pressing Confirm.

DO NOT turn off the Case Air or Case Remote App during the update process as this may damage the hardware and render the Case Air unrepairable. The firmware update process will take approximately 3 minutes.

After the firmware update has completed, exit the Case Remote app, ensure your device is connected to the Case Remote WiFi, then restart the Case Remote App.
The Case Remote App allows you to both review the current camera settings as well as adjust them. Any setting changes made on the camera will be updated in the app real-time. Likewise, any changes made in the app will be displayed appropriately on the camera.

ADJUSTING PROPERTIES
1. Select the current shooting mode icon or swipe right to open the camera Properties menu
2. Select the property to change
3. Select the new setting
SAVING PROPERTIES
Save camera settings for future quick use:
1. Open the Properties menu
2. Set the properties
3. Save the properties
4. Name the properties

LOADING PROPERTIES
Load previously saved camera settings:
1. Open the Properties menu
2. Tap Load
3. Select the settings you wish to load

UPDATING PROPERTIES
To update a previous property with new settings:
1. Load the property
2. Change the desired settings
3. Save the properties
4. Retain the previous property name

DELETING PROPERTIES
To delete a previously saved property:
1. Select the Load button in the Properties menu
2. Select the Delete button
3. Select the Red X next to any saved properties you desire to delete

FOCUS
Case Remote options to change/alter focus:
1. Touch Focus in Live View
2. Auto Focus
3. Focus Adjust Settings
4. Manual Focus
FULL SCREEN LIVE VIEW
To view in full screen mode, select the Expand button and tilt the mobile device to landscape.
- Parameters
- Exit Full Screen
- Flyout menu featuring Grid, Histogram and Focus Peaking

NOTE: You cannot view in full screen mode on tablets or computers, only on smartphones.

ADVANCED FUNCTIONS
Press the Advanced Functions Icon or swipe to the left to access your advanced function menu. Here you will be able to access these functions:
- Bracketing/HDR
- Bulb Time
- Focus Stacking
- Time Lapse
- Movie
BRACKETING/HDR
Bracketing or HDR takes multiple photos; one using the camera’s settings, and a series intentionally underexposed, and intentionally overexposed. The images are then combined in post processing into an image with preferred exposure.

HOW TO USE BRACKETING/HDR
1. Select the desired number of shots
2. Select the desired method to change exposure (Options depend on camera mode Av, Tv, M)
3. Select the starting exposure compensation
4. Select the exposure compensation stepping
5. Press the shutter button to begin taking shots

NOTE: Case Remote App only provides Bracketing/HDR shooting control; it does not provide post processing functions.

BULB TIME
Keep your camera’s shutter open for a long exposure photo.

HOW TO USE BULB TIME
1. Set the Duration of your shot
2. Press the shutter button to begin shot
FOCUS STACKING
The Focus Stacking function can be used to take shots of the same view at different focal distances. These images can then be post processed together so that the entire view is in focus.

+2 +1 +0 -1 -2

NOTE: Case Remote App only provides Focus Stacking shooting control; it does not provide post processing functions.

HOW TO USE FOCUS STACKING
1. Select the Number of shots, up to 9.
2. Select the focal length Steps:
   +1/-1 small step, +2/-2 medium step, +3/-3 large step
3. Press Shutter Button to start.

TIME LAPSE
Time Lapse photography takes multiple shots over a determined period of time.

NOTE: Case Remote App only provides Time Lapse shooting control; it does not provide post processing functions.

HOW TO USE TIME LAPSE
1. Select the Number of shots, up to 1000.
2. Select the Start time - the delay after you press the shutter button.
3. Select the Interval time - the time between each shot.
4. Press the Shutter Button to start. To stop the Time Lapse at any point, press the Shutter Button.
MOVIE
The Movie Mode in the Case Remote App allows you to capture video and transfer the video to your device – wirelessly.

HOW TO USE MOVIE
1. Press the Shutter Button to begin taking video.
2. Press the Shutter Button to stop recording.

NOTE: Case Remote App only provides Movie shooting control; it does not provide post-processing functions.

ALBUM
The Album provides an array of thumbnail images of shots that are stored on your camera’s SD card. In the photo album you can download, delete, or review the EXIF information of individual or a selected number of photos:
1. Photos on the phone, tablet or computer.
2. Media filter based on JPEG, RAW and Video files.
3. Photos on the camera’s card.
HOW TO USE ALBUM
1. Select each photo individually or select all to download.
2. Select a photo to review the EXIF information.
3. Compare selected shots.
4. Select each photo individually or select all to delete.

CLIENT LOCK
Client Lock allows you to disable the ability to shoot and change camera settings from the Android phone or tablet. Use Client Lock when you have another person reviewing photos as you shoot. They will be able to see and review images but won’t be able to manipulate the camera.
1. From the Settings tab, tap on “ENTER”
2. Enter a four digit passcode used to remove Client Lock
3. A confirmation that your Passcode has been set will appear
4. To unlock, tap “EXIT” from the Settings tab next to Client Lock. Enter the four digit passcode entered from step 2.

Note: If you cannot remember your passcode, restart the app by tapping the recent applications menu, tap the Case Remote app and swipe it to the right.
## SETTINGS

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Auto Thumbnails</strong></td>
<td>Automatically shows thumbnail preview after every shot.</td>
</tr>
<tr>
